-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 11-16 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Corey et al '601.

See Fig. 2, labeled "prior art". Each outer edge of the cells have creases, or fold lines, adjacent to the tabs.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 11-17 are rejected under 35 U.S.C. 103(a) as being unpatentable over Corey et al '601 in view of Rosette.

Note: the Rosette is referenced in interference cases 104,328 and 104,329, which involved a parent of this application, as well as in a related CAFC case (Newell vs. Springs).

Fig. 2 of Corey et al discloses tabs at both sides of the multicellular shade. However, making each layer of cells from a single strip of material with one edge having tabs, made of the free ends of the strip, and the other edge being a fold line, or crease,

Art Unit: 3634

is suggested by the Rosette, each cell of which is a single strip with free edges joined at a tab and with a fold or crease at the other edge of the cell. In view of this teaching, it would have been obvious to modify Cory et al whereby he has one edge that is a fold, to increase appearances. The size of the tab is likewise an obvious design choice based on desired appearances.

Claim 17 is rejected under 35 U.S.C. 103(a) as being unpatentable over Corey et al '601.

The size of the tab is an obvious design choice based on desired appearances.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
